ANNUAL REPORT ON TOBACCO STATISTICS, 1942

Prepared by

the

Agricultural Marketing Administration

---

---

This is the seventh in a series of annual reports on tobacco statistics authorized and requested by Congress on August 27, 1935. The first three are United States Department of Agriculture Statistical Bulletins 58, 63, and 67, and the fourth, fifth, and sixth are processed publications. All are obtainable from the Agricultural Marketing Administration, U. S. Department of Agriculture, Washington, D. C.

---

# CONTENTS

	Table	Page
Introduction -----		1
Brief of classification of leaf tobacco -----		3
Acreage, production, and farm value:		
United States, by classes, types, and States -----	1	5
United States, total by States -----	2	21
Foreign, United States, and world production, totals -----	3	26
Foreign and United States, production of flue-cured -----	4	27
Prices, products:		
Wholesale -----	5	28
Retail -----	6	29
Containers:		
Dimensions and weights -----	7	30
Sales:		
Ranges in bids on auction markets -----	8	30
By types and markets -----	9	31
Country sales -----	10	36
Income:		
Cash to growers, by classes and types -----	11	36
Summary of cigar-leaf grades:		
Connecticut shade-grown -----	12	37
Stocks:		
Unstemmed and stemmed, total by quarters -----	13	38
Converted weight basis, by types and quarters -----	14	39
Conversion factors -----	15	53
By types and groups of grades, by quarters -----	16	54
Barley, by groups and qualities -----	17	68
Miscellaneous domestic -----	18	70
Foreign-grown cigar leaf in the United States -----	19	71
Foreign-grown cigarette and smoking tobacco in the United States -----	20	72
Byproducts diversion program:		
For dark tobaccos -----	21	72
Consumption:		
Disappearance, farm-sales weight, by types -----	22	73
Leaf used in manufacture of products -----	23	77
Products manufactured -----	24	77
Tax-paid withdrawals by products and months -----	25	78
Per capita, United States -----	26	82
International trade:		
Annual, by principal countries -----	27	83
Exports:		
Leaf, by countries and types -----	28	84
Leaf, total by types, crop year -----	29	87
Leaf, total by types, calendar year -----	30	87
Products, total including shipments to noncontiguous territories -----	31	88
Lend-lease:		
Deliveries for shipment of flue-cured and dark types -----	32	88
Commodity Credit Corporation program:		
Purchases, loans, and collateral outstanding -----	33	89
Imports:		
By classes and countries -----	34	90
By products and countries -----	35	91
Tariffs:		
Rates on imports into the United States -----	36	92
Foreign rates on imports from the United States -----	37	94
Railway freight traffic:		
Revenue freight originated, quarterly -----	38	96
Taxes and revenue:		
Current rates of State tax, by products -----	39	97
Current rates of Federal tax, by products -----	40	100
Current rates of city tax, by products -----	41	100
State receipts -----	42	101
Internal Revenue receipts, by products -----	43	101
Agricultural Conservation Program:		
State acreage allotments -----	44	102

## I N T R O D U C T I O N

Review of the 1941-42 season:

The 1941-42 tobacco season was characterized by a small crop, high prices and a record consumption of tobacco products. The 1941 crop totaled 1,261 million pounds compared with 1,462 million pounds in 1940, and was the smallest crop since 1936, when 1,155 million pounds were produced. The season average price to growers for all types combined was 26.3 cents, compared with 16.0 cents for the 1940 crop - an increase of 64 percent. No crop has sold at an average approaching the 1941 price since 1919, when the average price to growers was 31.2 cents. Factors that contributed to the higher prices were the small crop of good quality, especially of flue-cured; increasing consumption of tobacco products; prospects for increased exports, under Lend-Lease, over the low level of the previous year; the desire of domestic manufacturers to outbid other buyers and to continue to hold heavy inventories; and recognition that marketing quotas and general economic conditions would probably prevent any substantial increase in production during the next year. Increased consumer income accompanying intensified industrial activity, as usual, resulted in an increased demand for tobacco products.

The 1941 flue-cured crop of 650 million pounds was 110 million pounds less than the 1940 crop - representing 55 percent of the 201 million-pound decrease in the total crop; the Burley crop decreased 37 million pounds; fire-cured, 35 million pounds; other classes and types, combined, 19 million pounds. The season average prices received for the 1941 crop of flue-cured and Burley were 28.1 and 29.3 cents respectively, compared with 16.4 and 16.2 cents for the 1940 crop. Fire-cured and dark air-cured averaged 14.0 and 12.0 cents, respectively, compared with 9.5 and 7.7 cents in 1940. All cigar types combined averaged 19.2 cents compared with 17.4 cents a year earlier. Prices received by growers for the light types of tobacco - flue-cured, Burley, and Maryland - were especially favorable, reflecting increased consumption of tobacco products, especially cigarettes, manufactured from these types, and increased flue-cured exports under Lend-Lease.

Tax-paid withdrawals of cigarettes for the fiscal year ended June 30, 1942, indicated consumption of 217 billion cigarettes compared with 190 billion during the preceding fiscal year. At the close of the fiscal year prospects were for some further increase in consumption. Deliveries of flue-cured tobacco for shipment under Lend-Lease totaled more than 214 million pounds (export weight) up to July 31, 1942. Tax-paid withdrawals of cigars during the fiscal year totaled 6.1 billion compared with 5.7 billion a year earlier; 41.3 million pounds of snuff compared with 38.3 million pounds; and 289.6 million pounds of manufactured tobacco (smoking and chewing) compared with 305.1 million pounds during the previous fiscal year. Smoking and chewing tobaccos combined constituted the only group for which withdrawals decreased. Increased industrial activity brought about some increase in the manufacture of chewing tobacco in the last months of the fiscal year, probably resulting from greater use of chewing tobacco in industries where smoking is prohibited.

Government market activity during the 1941-42 season consisted of the purchase of 120 million pounds of the flue-cured crop through the Commodity Credit Corporation for British account; purchase of 18 million pounds of dark tobaccos; loans to marketing associations on 8.9 million pounds of dark tobaccos and on about 6 million pounds of Burley; and diversion to byproducts of nearly 9 million pounds of dark tobaccos. Commodity Credit Corporation purchase and loan prices were so determined that they averaged not less than 85 percent of parity during the 1941-42 season, whereas during the preceding season they were about 75 percent of parity. High prices and keen competition by domestic manufacturers curtailed the amounts obtained by the Commodity Credit Corporation as compared with the previous season.

War conditions, especially since December 7, 1941, curtailed imports and caused shortages in many materials used by the tobacco industry. Imports of the 1941 crop of Sumatra leaf arrived in the United States prior to the Japanese invasion of the Netherlands Indies; imports from the Philippine Islands ceased; but imports of Oriental leaf were fairly well maintained throughout the year. Imports of cigarette paper, licerice, brier and other root, and pipes and pipe bowls were greatly reduced. Processors in May 1942 were required to reduce the use of sugar to 70 percent of that used in 1941, the quota being raised to 80 percent in July. Glycerine (20 to 22 million pounds of which are normally used) was rationed at 70 percent of the 1940 consumption. Because of restrictions on the use of those materials needed in war industries, most containers and packaging had to be changed. Labor shortages were experienced, especially by the cigar industries. Growers encountered some shortage of fertilizer, partly because of transportation difficulties.

All tobacco products were included under the General Maximum Price Regulation issued April 28, 1942, by the Office of Price Administration. Beginning December 31, 1941, however, manufacturers' prices of cigarettes had been set at the levels prevailing on December 26, 1941. The ceiling on cigarettes was instituted, temporarily, to prevent an immediate increase in the price of one of the leading brands from \$6.53 to \$7.10 per thousand. On the basis of a cost study it was decided on March 23, 1942, to continue the cigarette price ceiling at the December level.

Changes in 1942 Annual Report on Tobacco Statistics:

Several tables appearing in the 1941 issue have been omitted, either because of inadequacy or lack of new data, or for the purpose of conserving materials and labor. For instance, the season average prices, by types and grades, which appear in the Market Reviews are not duplicated in this report. No new data were available on wages and material costs in the tobacco industry. The table on international trade in leaf tobacco by countries of origin and destination is omitted because of the scarcity of data resulting from war conditions. United States export and import data by countries have not been available for publication since April 1941, and data on total exports have not been available since September 1941; hence, 1940-41 crop-year exports by countries are incomplete and 1941 calendar-year data are not included. Tables 1 and 2 have been revised from 1929 to 1939 on the basis of census data.

New tables included are:

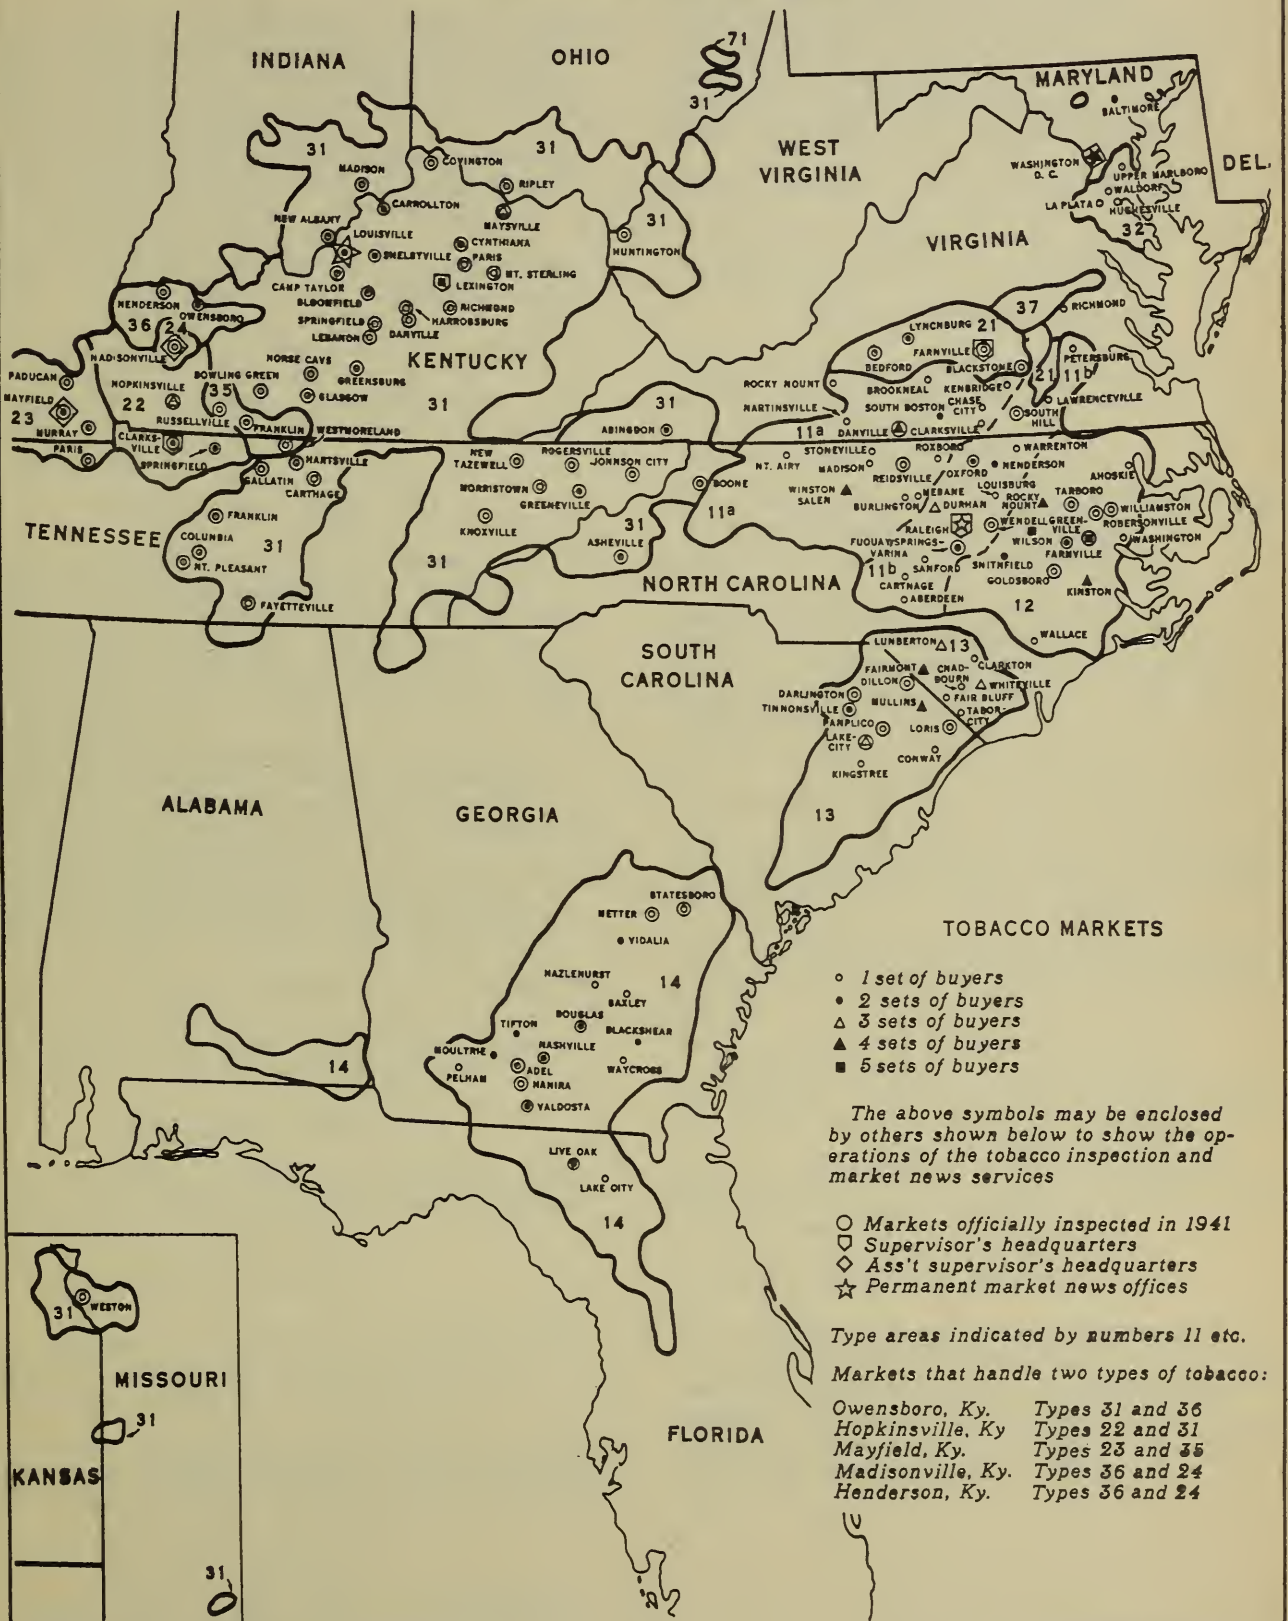

The 1941-42 diversion program for dark tobaccos; deliveries under the Lend-Lease Act through July 31, 1942; and purchase and loan activities of the Commodity Credit Corporation through July 31, 1942. Table 11 in the second Annual Report on Tobacco Statistics, Stat. Bul. No. 63, on the usual specifications and capacity of tobacco shipment and storage containers is repeated herein in response to requests connected with wartime storage and shipment of tobacco. It is believed that the statistical data in the 1942 annual report are those most in demand by the tobacco industry in general. Suggestions for additional data for inclusion in succeeding annual reports will be welcomed and given consideration.

# TOBACCO

## AUCTION MARKETS AND PRODUCING AREAS, 1941

(CIGAR LEAF PRODUCING AREAS NOT SHOWN)

## BRIEF CLASSIFICATION OF LEAF TOBACCO

(Covering classes, types, and groups)

## CLASS 1, FLUE-CURED TYPES

Type 11: Old Belt flue-cured; produced in the Piedmont sections of Virginia and North Carolina.

Type 12: Eastern North Carolina flue-cured; produced in the coastal sections of North Carolina, north of the South River.

Type 13: South Carolina flue-cured; produced in the coastal sections of South Carolina and the southeastern counties of North Carolina, south of the South River.

Type 14: Georgia and Florida flue-cured; produced in southern Georgia and northern Florida.

Groups applicable to Types 11, 12, 13, and 14:

A, wrappers. B, leaf and smoking leaf.  
C, cutters. X, lugs and primings. S, scrap.  
N, nondescript.

## CLASS 2, FIRE-CURED TYPES

Type 21: Virginia fire-cured; produced in the Piedmont and mountain sections of Virginia.

Type 22: Tennessee-Kentucky fire-cured, eastern district, Clarksville, Springfield, and Hopkinsville; produced in a section east of the Tennessee River, in southern Kentucky and northern Tennessee.

Type 23: Kentucky-Tennessee fire-cured, western district, Mayfield, Murray, and Paducah; produced in a section between the Tennessee, Ohio, and Mississippi Rivers in western Kentucky and northwestern Tennessee.

Type 24: Henderson Stemming or Northern fire-cured; produced in Webster, Hopkins, McLean, Union, and Henderson Counties of Kentucky.

Groups applicable to Types 21, 22, 23, and 24:

A, wrappers. B, heavy leaf. C, thin leaf.  
X, lugs. S, scrap. N, nondescript.

## CLASS 3, AIR-CURED TYPES

Type 31: Burley; produced in Kentucky, Tennessee, Ohio, Indiana, West Virginia, Virginia, North Carolina, and Missouri.

Groups applicable to Type 31:

A, wrappers. B, bright leaf, red leaf, and tips. C, lugs, and cutters. X, trash and flyings. S, scrap. N, nondescript.

Type 32: Southern Maryland; produced in five counties of southern Maryland - Prince Georges, Anne Arundel, Calvert, Charles, and St. Marys.

Groups applicable to Type 32:

B, heavy leaf or dull crop. C, thin leaf or bright crop. X, seconds and ground leaves.  
S, scrap. N, nondescript.

Type 35: One Sucker; produced in north-central Tennessee and south-central Kentucky.

Type 36: Green River; produced in the northern part of Kentucky in the territory adjacent to Owensboro and Henderson.

Type 37: Virginia sun-cured; produced in central Virginia, north of the James River.

Groups applicable to Types 35, 36, and 37:

A, wrappers. B, heavy leaf. C, thin leaf.  
X, lugs. S, scrap. N, nondescript.

## CLASS 4, CIGAR-FILLER TYPES

Type 41: Pennsylvania Seedleaf; produced in Lancaster County, Pa., and the adjoining counties.

Groups applicable to Type 41:

B, binders or tops. C, fillers (farm wrappers).  
X, stemming grades. Y, farm fillers or ground leaves. S, scrap. N, nondescript.

Type 42: Gebhardt; produced in the Miami Valley Section of Ohio and extending into Indiana.

Type 43: Zimmer; produced in the Miami Valley section of Ohio and extending into Indiana.

Type 44: Dutch; produced in the Miami Valley section of Ohio.

Groups applicable to Types 42, 43, and 44:

C, fillers (farm wrappers). X, stemming grades.  
Y, farm fillers or ground leaves. S, scrap.  
N, nondescript.

Types 45 and 56: Georgia and Florida sun-grown; produced in southwestern Georgia and north-central Florida.

Groups applicable to Types 45 and 56:

B, binders. C, fillers. X, stemming grades.  
Y, ground leaves. S, scrap. N, nondescript.

Type 46: Puerto Rican sun-grown (including primed (Deshojado) and stalk-cut (Mata)); produced on the island of Puerto Rico.

Groups applicable to Type 46:

C, superior (tripas, medios, coronas, etc.).  
X, inferior (pie inferior, tripa inferior, pajizas, rezagos, etc.). Y, defectoso (boliche, sentido, cacho duro, amarillo, salcochado, etc.).  
S, scrap (pedazos and picadura). N, nondescript (averiado and mohoso).

## CLASS 5, CIGAR-BINDER TYPES

Type 51: Connecticut Broadleaf; produced in the Connecticut Valley sections of Connecticut and Massachusetts.

Type 52: Connecticut Havana Seed; produced in the Connecticut and Housatonic Valley sections of Connecticut and Massachusetts.

Type 53: New York and Pennsylvania Havana Seed; produced in the Big Flats and Onondaga sections of New York, and extending into Pennsylvania.

Groups applicable to Types 51, 52, and 53:

A, wrappers. B, binders, seconds, and brokes. C, fillers and short darks. X, stemming grades. Y, sand-leaf fillers or ground leaves. S, scrap. N, nondescript.

Type 54: Southern Wisconsin; produced in Wisconsin, south and east of the Wisconsin River.

Type 55: Northern Wisconsin; produced in Wisconsin, north and west of the Wisconsin River, and in eastern Minnesota.

Groups applicable to Types 54 and 55:

B, binders. C, fillers. X, stemming grades. Y, sand-leaf fillers or bottom leaves. S, scrap. N, nondescript.

## CLASS 6, CIGAR-WRAPPER TYPES

Type 61: Connecticut Shade; produced in the Connecticut Valley sections of Connecticut and Massachusetts.

Type 62: Georgia and Florida Shade; produced in southwestern Georgia and north-central Florida.

Groups applicable to Types 61 and 62:

A, wrappers. B, stout wrappers and binders. C, fillers or tips. X, filler brokes. S, scrap. N, nondescript.

## MISCELLANEOUS TYPES OF DOMESTIC TOBACCO

Type 71: Eastern Ohio (flue-cured, fire-cured, or air-cured).

Type 72: Louisiana Perique.

Type 73: All domestic types of tobacco not otherwise classified.

## FOREIGN TYPES

Type 81: Cuba (Havana).

Type 82: Sumatra and Java.

Groups applicable to Types 81 and 82:

A, wrappers. C, fillers. S, scrap.

Type 83: Philippine Islands (Manila).

Groups applicable to Type 83:

C, fillers. S, scrap.

Type 84: All foreign-grown cigar leaf not otherwise classified.

Type 90: Foreign-grown cigarette and smoking tobacco (Turkish and other).

1/ Crop value represents production multiplied by average price per pound. The term is used to avoid confusion with "income" as shown on a calendar-year basis in table 11 and in the multilith publication, Income Parity for Agriculture, pt. I, sec. 2.

2/ Subject to revision.

3/ Includes the amount of tobacco rendered unmarketable by growers operating under contract with the Agricultural Adjustment Administration as follows in thousands of pounds: Virginia fire-cured (type 21), 750; Kentucky and Tennessee fire-cured (type 22), 3,850; Kentucky and Tennessee fire-cured (type 23), 1,750; Henderson Stemming (type 24), 150; Burley (type 31), 18,000; One Sucker (type 35), 800; and Green River (type 36), 1,200. Price and value apply only to the marketable portion of the crop.

4/ Includes loss after harvest as a result of hurricane and flood estimated as follows in thousands of pounds: Broadleaf (type 51), 3,820; Havana Seed (type 52), 1,547; and Shade (type 61), 588. Price and value apply only to the marketable portion of the crop.

Bureau of Agricultural Economics, Crop Reporting Board. Estimates revised for some States in some years on basis of census data.

1/ Crop value represents production multiplied by average price per pound. The term is used to avoid confusion with "income" as shown on a calendar-year basis in table 11 and in the multilith publication, Income Parity for Agriculture, pt. I, sec. 2.

2/ Subject to revision.

3/ Includes loss after harvest as a result of hurricane and flood estimated as follows in thousands of pounds: Massachusetts, 1,258; and Connecticut, 4,697. Price and value apply only to the marketable portion of the crop.

4/ Includes the amount of tobacco rendered unmarketable by growers operating under contract with the Agricultural Adjustment Administration as follows in thousands of pounds: Ohio, 625; Indiana, 440; Missouri, 175; Kansas, 15; Virginia, 1,075; West Virginia, 75; North Carolina, 160; Kentucky, 19,725; and Tennessee, 4,210. Price and value apply only to the marketable portion of the crop.

Bureau of Agricultural Economics, Crop Reporting Board. Estimates revised for some States in some years on basis of census data.

1/ The year beginning July includes the harvesting season in both Northern and Southern Hemispheres. In Northern Hemisphere, data for 1937, for example, are for crops harvested in summer and fall of 1937; in Southern Hemisphere they are for crops harvested in spring of 1938. For many countries bordering on the Equator, harvest started late in 1937 and was completed in early months of 1938. Countries listed in this table produce approximately 95 percent of the tobacco of the world.

2/ Preliminary. Figures for earlier years may be revised on basis of later information.

3/ Burma became independent from British India in April 1937.

4/ Data shown are for 20 Provinces only, but missing data are of slight importance. Data for 1938 are for 14 Provinces, only.

5/ British India and reporting native States; Burma not included.

6/ European estate production and native production of Blad tabak (high grade leaf) bought up by European estates from natives plus official estimate of exports of native-grown Krossok (low grade leaf) produced off estates.

7/ Excluding China.

Bureau of Agricultural Economics. Compiled from official sources, International Institute of Agriculture, and reports of United States consuls, commercial attaches, agricultural attaches, and commodity specialists in foreign countries.

Total reporting countries ..	1,297,635	1,127,887	1,620,371	<sup>8/</sup> 1,177,850	

<sup>1/</sup> Estimated production of other types, by countries, is omitted due to lack of comparable data. Indications of production of other types grown in many foreign countries were published last in Annual Report on Tobacco Statistics, 1938, Stat. Bul. No. 67, pp. 18-20.

<sup>2/</sup> The year beginning July includes the harvesting season in both Northern and Southern Hemispheres. In Northern Hemisphere, data for 1937, for example, are for crops harvested in summer and fall of 1937; in Southern Hemisphere they are for crops harvested in spring of 1938. For many countries bordering on the Equator, harvest started late in 1937 and was completed in early months of 1938.

<sup>3/</sup> Preliminary. Data for earlier years may be revised on basis of later information.

<sup>4/</sup> Estimated.

<sup>5/</sup> Smaller crop resulted from unfavorable weather, parasites, and diseases, which destroyed much of the area set.

<sup>6/</sup> Of this amount, a portion was produced from flue-cured seed but was sun-cured.

<sup>7/</sup> Grown in Java.

<sup>8/</sup> Incomplete. Production for Cyprus, Northern Rhodesia, and the Union of South Africa, included in other years, not available for 1940.

Bureau of Agricultural Economics. Compiled from official sources, reports of United States consuls, commercial attaches, agricultural attaches, and commodity specialists in foreign countries.

<sup>1/</sup> Prices were obtained from approximately 4 dealers in each of 32 large cities as of the 15th of the month, for the brand and/or package size most in demand in their stores, and have been weighted by population of the metropolitan areas and of adjacent areas, where the retail prices were obtained.

Sales taxes are included wherever applicable.

<sup>2/</sup> Representing an average of cigars selling for 5 cents or less.

<sup>3/</sup> Pricing of cigarette tobacco and plug discontinued after March 1939.

Bureau of Agricultural Economics. Compiled from reports of the Bureau of Labor Statistics, Department of Labor.

Table 7.—Usual inside dimensions of tobacco shipment and storage containers and approximate range in net weight of unstemmed tobacco per container

Class or type	Container	Diameter	Depth	Width	Length	Net weight
		Inches	Inches	Inches	Inches	Pounds
Flue-cured	Hogshead	48	48 or 54	---	---	900-1,100

Cigar leaf	Case	---	30	30	36-44	250- 360
Cigar leaf (shade-grown)	Bale	---	12	32	32	150- 170
Black fat, water baler, and dark African	<u>2/</u>	---	---	---	---	<u>2/</u>

<sup>1/</sup> Prior to the first loose-leaf auction of Maryland tobacco in May 1939, Maryland hogsheads were packed, and frequently made, by farmers. This still holds for that portion of the crop sold through the Baltimore market. There is no standard size for Maryland containers but the tendency is toward hogsheads 46 by 52 inches.

<sup>2/</sup> Packed in tierces (about  $\frac{1}{2}$  hogshead) and in heavy wooden boxes; wide variations in dimensions of containers; much heavier than other types because of added oils and extra heavy pressure applied.

Table 8.—Ranges of bids on tobacco auction markets, by types, in effect 1941-42 season

Type name	Type number	Ten cents	Twenty-five cents	Fifty cents	One dollar
Flue-cured	11-14	---	Under \$15.00	\$15.00 to \$25.00	Over \$25.00
Virginia fire-cured	21	Under \$6.00	\$6.00 to \$15.00	\$15.00 to \$25.00	Over \$25.00
Tennessee and Kentucky fire-cured	22	---	Under \$20.00	\$20.00 to \$30.00	Over \$30.00
Kentucky and Tennessee fire-cured	23	Under \$5.00	\$5.00 to \$20.00	\$20.00 to \$30.00	Over \$30.00
Henderson Stemming	24	---	Under \$20.00	\$20.00 to \$30.00	Over \$30.00
Burley <sup>1/</sup>	31	---	Under \$15.00	\$15.00 to \$30.00	Over \$30.00
Southern Maryland	32	---	Under \$15.00	\$15.00 to \$25.00	Over \$25.00
One Sucker	35	---	Under \$20.00	\$20.00 to \$30.00	Over \$30.00
Green River	36	---	Under \$20.00	\$20.00 to \$30.00	Over \$30.00

<sup>1/</sup> On some Burley markets fifty cent bid was from \$15.00 to \$25.00, and one dollar bid over \$25.00.

Table 9.—Producers' sales, value, and average price, by types and markets, for tobacco sold at auction in the United States, crops of 1940 and 1941

Virginia:						
Richmond	2,147,518	385,620	17.96	3,133,952	292,223	9.32

## TOTAL DARK AIR-CURED, TYPES 35-37

All markets:						
Type 35 3/	15,460,263	1,795,676	11.61	20,774,399	1,664,688	8.01
Type 36	13,273,053	1,553,710	11.70	17,397,371	1,328,907	7.64
Type 37	2,147,518	385,620	17.96	3,133,952	292,223	9.32
Total	30,880,834	3,735,006	12.09	41,305,722	3,285,818	7.95

1/ In addition to total warehouse auction sales of the 1941 crop, it is estimated that 21 million pounds of scrap were sold by growers outside regular auction channels at an average of \$2.41 per hundred. Sales of scrap in the 1940 crop were from 35 to 40 million pounds at an average of about \$2.50 per hundred.

2/ Includes Association deliveries at advance prices.

3/ Includes country sales.

4/ Gross sales.

5/ Includes Camp Taylor, Ky.

6/ Resales for the 1941 crop amounted to approximately 5.3 percent of gross warehouse sales; for the 1940 crop, 6.9 percent. Producers' sales for the 1941 crop are estimated.

7/ Sales of Maryland tobacco occur in the year following production. Data shown are for the 1939 and 1940 crops, sold in 1940 and 1941. Sales represent a combination of hogshead sales on the Baltimore market and auction sales on the markets of Hughesville, La Plata, Upper Marlboro, and Waldorf. The 1939 crop, sold in 1940, included also direct sales between the grower and dealer.

Compiled from reports of State departments of agriculture; trade reports; records of the Agricultural Adjustment Administration; and data obtained direct from markets and trade sources by field representatives.

<sup>1/</sup> Grading of Connecticut shade-grown tobacco was discontinued with the 1940 crop. The revised and final figures for 1940 complete the available data.

<sup>2/</sup> Key to standard grade marks for Connecticut shade-grown tobacco:

Group	Quality	Color	Special factor	Length
A, wrappers.	1, first.	L, golden brown.	K, variegated	8 <sup>1</sup> / <sub>2</sub> , 8 to 9 inches.
B, stout wrappers and binders.	2, second.	F, light brown.	P, sand-leaf primings.	9 <sup>1</sup> / <sub>2</sub> , 9 to 10 inches.
C, fillers or tips.	3, third.	R, reddish brown.	U, unsound or damaged under 20 percent.	10 <sup>1</sup> / <sub>2</sub> , 10 to 11 inches.
X, filler brokes.	4, fourth.	G, green.	V, greenish tinged.	11 <sup>1</sup> / <sub>2</sub> , 11 to 12 inches.
S, scrap.	5, fifth.		W, doubtful keeping order.	12 <sup>1</sup> / <sub>2</sub> , 12 to 13 inches.
N, nondescript.			X, broken wrappers.	13 <sup>1</sup> / <sub>2</sub> , 13 to 14 inches.
			Y, string-tied and unsorted.	14 <sup>1</sup> / <sub>2</sub> , 14 to 15 inches.
				15 <sup>1</sup> / <sub>2</sub> , 15 to 16 inches.
				16 <sup>1</sup> / <sub>2</sub> , 16 to 17 inches.
				17 <sup>1</sup> / <sub>2</sub> , 17 to 18 inches.
				18 <sup>1</sup> / <sub>2</sub> , 18 to 19 inches.
				19 <sup>1</sup> / <sub>2</sub> , 19 to 20 inches.
				20 <sup>1</sup> / <sub>2</sub> , 20 to 21 inches.
				21 <sup>1</sup> / <sub>2</sub> , 21 to 22 inches.

<sup>3/</sup> Includes mixed.

<sup>4/</sup> Does not include 4,461 bales first priming.

<sup>5/</sup> Does not include 3,698 bales first priming.

<sup>6/</sup> Includes inferior grades not colored.

<sup>7/</sup> Includes unsized.

Table 14.-Stocks of leaf tobacco, by types as reported and on a converted weight basis, owned by dealers and manufacturers in the United States, quarterly, 1937-41 1/ - Cont'd

1/ For factors used in converting various weights, see table 15. For earlier data and for more detailed information on weight losses, see U. S. Department of Agriculture Circular 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937.

2/ Figures are sums of types 22 and 23, computed separately.

3/ In October 1939 and January 1940, a conversion factor of 1.10 was applied to 350 and 400 million pounds respectively of the unstemmed stocks, and 1.12 to the balance. Beginning April 1940, a conversion factor of 1.11 was applied to all unstemmed stocks.

4/ Stocks of type 41 have been revised through April 1, 1940, deducting 5 million pounds from unstemmed stocks.

5/ Figures are sums of types 42, 43, and 44, computed separately.

6/ Figures are sums of stocks in continental United States and Puerto Rico, computed separately.

7/ Figures are sums of types 54 and 55, computed separately.

1/ For stocks of Burley tobacco by qualities, see table 17.

2/ This group is not found in this type.

3/ Stocks of type 41 have been revised through April 1, 1940, deducting 5 million pounds from stocks of the C group.

4/ B group added in October 1937 to include stocks of binder type sun-grown tobacco produced in Georgia and Florida.

1/ The 1941-42 program for the diversion of not more than 12,000,000 pounds of dark tobaccos became effective on December 11, 1941. The Surplus Marketing Administration paid to tobacco marketing associations  $1\frac{1}{2}$  cents per pound for leaf sold to manufacturers of byproducts, provided the associations had advanced to growers on such leaf not less than 5 cents per pound on Types 22, 23, 24, and 36, and not less than 4 cents per pound on Type 35. When the Agricultural Marketing Administration was established on December 13, 1941, that organization took over the activities of the Surplus Marketing Administration. Effective April 10, 1942, the Agricultural Marketing Administration was also authorized to pay to marketing associations a maximum of 5 cents per pound on leaf of Types 22, 23, 24, 35, and 36 provided (1) that the associations had made advances listed on the schedule of grades and values for the various types approved by the Commodity Credit Corporation in the season when marketed, and (2) that for loose-leaf tobacco of the 1941 crop the advances must have been in excess of 4 cents per pound for Type 35 and in excess of 5 cents per pound for the other types. Sales or contracts for sale under the program could not be made later than June 30, 1942, under the original offer, or June 15, 1942, under the amended offer. No diversion programs were in effect during the 1939-40 and the 1940-41 seasons. For programs beginning March 1936, see tables 50-53 of the 1941 Annual Report on Tobacco Statistics.

2/ Storage order basis.

3/ Farm-sales-weight basis.

4/ Cost to the Government. Under the original December 11, 1941 offer, the cost was 1.5 cents per pound for tobaccos eligible and actually diverted. For tobaccos diverted under the April 10, 1942 amendment, the cost is calculated for prized tobaccos as the difference between advances to cooperative associations (including handling, storage, and interest charges), and the prices paid by manufacturers for quantities purchased for use in byproducts; for loose-leaf tobaccos, the difference between advances by cooperative associations to growers and the prices paid by manufacturers. Under the amendment, sales to byproduct manufacturers were required to be at not less than  $3\frac{1}{2}$  cents per pound for Types 22, 23, 24, and 36 and not less than  $2\frac{1}{2}$  cents per pound for Type 35. Average cost per pound is calculated on actual, not rounded, figures.

1/ This table has been revised in agreement with production revisions in table 1 of this publication.

2/ Stocks as of July 1 and disappearance beginning July 1.

3/ Stocks shown represent those held by dealers and manufacturers who are required by law to file quarterly reports. Farm-sales weight is calculated by converting stemmed to unstemmed and storage weight to farm-sales weight, by allowing for normal losses of dirt, sand, moisture, and stem in handling and preparing tobacco.

4/ Preliminary.

5/ Includes the amount of tobacco rendered unmarketable by growers operating under contract with the Agricultural Adjustment Administration as follows in thousands of pounds: Virginia fire-cured (type 21), 750; Kentucky and Tennessee fire-cured (type 22), 3,850; Kentucky and Tennessee fire-cured (type 23), 1,750; Henderson Stemming (type 24), 150; Burley (type 31), 18,000; One Sucker (type 35), 800; and Green River (type 36), 1,200. Price applies only to the marketable portion of the crop.

6/ Stocks as of January 1 of year following production, and disappearance beginning January 1 of year following production.

7/ Stocks not reported separately for types 45 and 56.

8/ Less than 100,000 pounds.

9/ Based on actual, not rounded, figures.

10/ Production (for the crop year beginning July) compiled from annual reports of the Governor of Puerto Rico; prices from The Farm Price of Tobacco in Puerto Rico, translation of Bul. No. 60, by Agricultural Experiment Station, Rio Piedras, P. R., June 1941, p. 6; stocks as of January 1 in the crop year include stocks held by dealers and manufacturers both in the United States and on the Island of Puerto Rico.

11/ Including loss after harvest as a result of hurricane and flood estimated as follows in thousands of pounds: Broadleaf (type 51), 3,820; Havana Seed (type 52), 1,547; and Shade (type 61), 568.

Table 23.-Leaf tobacco used in the manufacture of cigars, cigarettes, and tobacco and snuff in the United States, 1936-40 <sup>1/</sup>

Year	Cigars		Cigarettes		Tobacco and snuff	Total
	Large	Small	Large	Small		
	1,000 lb.	1,000 lb.	1,000 lb.	1,000 lb.	1,000 lb.	1,000 lb.
1936	125,875	703	12	453,315	267,462	847,367
1937	127,880	773	19	479,943	264,309	872,924
1938	118,162	590	14	483,826	262,710	865,302
1939	122,072	609	25	509,108	253,485	885,299
1940	126,309	526	14	535,204	260,663	922,716

<sup>1/</sup> The quantities given are unstemmed processing-weight equivalent of all kinds of tobacco used. Stemmed leaf and scraps, etc., used in manufacturing have been converted to unstemmed equivalent at the ratio of 3 pounds stemmed to 4 pounds unstemmed.

Compiled from annual reports of the Commissioner of Internal Revenue.

<sup>1/</sup> This table on per capita consumption of tobacco products includes several revisions and supersedes all other per capita consumption data published in earlier Annual Reports on Tobacco Statistics. Calendar year data 1900-1909 were derived by averaging adjacent fiscal year data. Tax paid withdrawals of products from the Philippine Islands and Puerto Rico are not available for these early years (1900-1909); imports from the Philippine Islands and shipments from Puerto Rico have been included in lieu of withdrawals.

<sup>2/</sup> Pounds of cigars and cigarettes represent unstemmed equivalent of tobacco used in the manufacture of these products. Both large and small cigars and large and small cigarettes are included. Revised conversion factors have been used in determining unstemmed equivalent of leaf used in the manufacture of cigars and cigarettes, 1900-1921.

<sup>3/</sup> Tax-paid withdrawals of manufactured tobacco have been separated into chewing tobacco and smoking tobacco in proportion to production of these two products.

<sup>4/</sup> Preliminary.

Bureau of Agricultural Economics. Compiled from tax paid withdrawals in the United States (including tax paid withdrawals of tobacco products from the Philippine Islands and Puerto Rico) reported in monthly statements by the Commissioner of Internal Revenue, and July population. Population figures for 1910-29 are estimates by P. K. Whelpton, Scripps Foundation for Research in Population Problems; 1900-1909 based on a straight-line interpolation between July 1, 1900 population from the Bureau of the Census and July 1, 1910 figure from Scripps Foundation; 1930-41, estimates of the Bureau of the Census.

1/ The export statistics in this table are on the basis of crop years. Crop years are as follows: Flue-cured, year beginning July; Maryland, year beginning January of year following production; all other types, year beginning October. These figures do not include shipments to Puerto Rico; no shipments were made to Alaska and Hawaii.

2/ Preliminary. Exports by countries of destination after March 1941 are not available for publication. Therefore, the data for this year (1940), except Maryland tobacco which is for the calendar year 1940, are for the following periods: Flue-cured, July 1940-March 1941; all other types (except Maryland) October 1940-March 1941. Maryland data for 1941 are for the period January-March 1941. 3/ Includes Hong Kong and Kwantung. 4/ Beginning May 6, 1938, the United States trade with Germany includes Austria; for comparable figures in earlier years add Austria and Germany. 5/ Exclusive of Algeria, Tunisia, and Madagascar.

6/ Includes Gold Coast, Nigeria, and other British West Africa. 7/ Includes Canary Islands.

8/ Includes Eastern Ohio, type 71. 9/ Includes 1,682,000 pounds to Germany.

10/ Black Fat, Water Baler, and Dark African are composed principally of fire-cured and One Sucker tobacco, which have been treated with oils and greases, packed in boxes, bales, and tierces, and subjected to heavy pressure. Approximate percentages are two-thirds One Sucker and one-third fire-cured. In some cases a small amount of flue-cured might be substituted for that portion of one of the other types.

11/ Exclusive of Mozambique. 12/ Exclusive of Bermuda, Barbados, Jamaica, Trinidad and Tobago.

13/ Less than 500 pounds.

1/ Rates are as of August 1, 1942.

2/ Tobacco imported from the Philippine Islands is free of duty except that imports of the following items from the Philippines after December 31, 1939, in excess of the specified quotas shall pay the duty applicable to imports from countries other than Cuba:- Original quotas are for the calendar year 1940 and for each calendar year thereafter through the calendar year 1945, each of said quotas shall be the same as the corresponding quota for the immediately preceding calendar year, less 5 per centum of the corresponding original quota. The original quota for cigars (exclusive of cigarettes, cheroots, and paper cigars and cigarettes including wrappers) two hundred million cigars. The original quota for scrap tobacco, and stemmed and unstemmed filler tobacco described in paragraph 602 of the Tariff Act of 1930, four million five hundred thousand pounds. For the period January 1, 1946, through July 3, 1946, each of said quotas shall be one-half of the corresponding quota specified for the calendar year 1945.

3/ This rate was established by the Netherlands Trade Agreement, which became effective February 1, 1936. From that date until June 30, 1936, the rate on unstemmed wrapper tobacco was \$1.875, and on stemmed wrapper tobacco, \$2.525. The present reduced rates on this tobacco have been in effect since July 1, 1936.

Continued -

Table 36.-Tariff rates on tobacco and tobacco products imported into the United States; established by the Tariff Act of 1930, and subsequent changes - Cont'd

- 4/ The rate was reduced under the Trade Agreement with Turkey, effective May 5, 1939.
- 5/ The rate was reduced under the Trade Agreement with the United Kingdom, effective January 1, 1939.
- 6/ Under the treaty of commercial reciprocity concluded between the United States and Cuba in 1902, which is continued in effect by section 316 of the Tariff Act of 1930, imports of Cuban tobacco into the United States are entitled to a reduction of 20 percent from the prevailing rate paid by any other country. The only exception to this rule was the Cuban Trade Agreement of September 3, 1934, which established specific rates for certain classes of tobacco; the tobacco concessions of this agreement were terminated March 16, 1936. The rates above listed for tobacco from Cuba have been computed by applying the 20 percent preferential reduction first to the rates established in the Tariff Act of 1930, and, for the present rate, to the reduced rates granted by existing Trade Agreements with other countries.
- 7/ From September 3, 1934, to March 16, 1936, the rate on unstemmed wrapper tobacco was \$1.50 per pound under the Cuban Agreement; the Agreement also provided that total imports of tobacco and tobacco products from Cuba were subject to a quota of 18 percent of tobacco used in manufacture of cigars in the United States during preceding year. With the termination of tobacco concessions in the Cuban Agreement, the Cuban duty became based on the new rates established under the Trade Agreement with the Netherlands. From February 1 until June 30, 1936, the Netherlands rate was \$1.875 per pound; after that date it was further reduced to \$1.50. The Cuban duty for both periods became 20 percent less than the Netherlands rate. The Supplementary Trade Agreement with Cuba, effective December 23, 1939, did not change this rate but the Second Supplementary Trade Agreement with Cuba, effective January 5, 1942, reduced it to 91 cents.
- 8/ Under the Netherlands Trade Agreement, effective February 1, 1936, the rate on stemmed wrapper tobacco was reduced to \$2.525 per pound for the period February 1 to June 30, after which a further reduction to \$2.15 per pound was made. The Cuban duty in the earlier period and at the present time, is 20 percent less than that established in the Netherlands agreement.
- 9/ Reduced as a result of the Trade Agreement with Turkey, effective May 5, 1939, in which the rate on unstemmed cigarette leaf, n.s.p.f. became 30 cents per pound.
- 10/ Under the Cuban Agreement, from September 3, 1934, to March 16, 1936, the rate on unstemmed filler tobacco (including cigarette leaf n.s.p.f.) was set at 17½ cents per pound, and on stemmed filler tobacco at 25 cents per pound; total imports of Cuban tobacco and tobacco products during this period were subject to a quota of 18 percent of tobacco used in manufacture of cigars in the United States during the preceding year. With the termination of tobacco concessions in the Cuban Agreement, the rates returned to the 1930 Tariff Act level. The Supplemental Cuban agreement, effective December 23, 1939, restored the rates of the original Cuban Agreement on filler tobacco other than cigarette leaf stemmed and unstemmed. The Supplemental Cuban agreement limits the application of reduced rates on stemmed or unstemmed filler tobacco (other than cigarette leaf) and scrap tobacco to a total quantity of 22,000,000 pounds (unstemmed equivalent) in any calendar year, imports in excess of this quantity becoming subject to duty as if not mentioned in the Supplemental Agreement but not to rates higher than those in effect just prior to the original Cuban agreement. The Second Supplemental Cuban Agreement, effective January 5, 1942, reduced the rate on filler tobacco other than cigarette leaf unstemmed to 14 cents, and stemmed to 20 cents.
- 11/ Reduced as a result of the Trade Agreement with the United Kingdom, effective January 1, 1939.
- 12/ Under the Cuban Trade Agreement, from September 3, 1934, to March 16, 1936, the rate on scrap tobacco was set at 17½ cents per pound, and on cigars and cheroots of all kinds at \$2.25 per pound plus 12½ percent ad valorem; total imports of Cuban tobacco and tobacco products during this period were subject to a quota of 18 percent of tobacco used in manufacture of cigars in the United States during the preceding year. With the termination of tobacco concessions in the Cuban Agreement, the rates returned to the 1930 Tariff Act level. The Supplemental Cuban Agreement restored these rates to their level under the original Cuban agreement and established the quota on scrap and filler tobacco described in footnote 10/. The Second Supplementary Cuban Trade Agreement, effective January 5, 1942, reduced the rate on scrap tobacco from Cuba to 14 cents per pound; and on cigars and cheroots from Cuba to \$1.80 plus 10 percent ad valorem.
- 13/ Under the Cuban Trade Agreement, from September 3, 1934, to March 16, 1936, the rate on cigarettes was set at \$2.25 cents per pound plus 12½ percent ad valorem, with a quota limit on total imports of tobacco and tobacco products from Cuba of 18 percent of tobacco used in manufacture of cigars in the United States during the preceding year. With the termination of the tobacco concessions in the Cuban Agreement, this rate returned to the 1930 Tariff Act level. The Trade Agreement with the United Kingdom, effective January 1, 1939, reduced the rate on cigarettes to \$2.25 cents per pound plus 12½ percent ad valorem, and the present Cuban rate is derived from this latter duty.

1/ Conversions into United States currency made at official exchange rate for 1940-42 (£ = \$4.035).

2/ Existing margin of preference to Empire countries was bound under trade agreement with the United Kingdom, effective January 1, 1939. Under the Ottawa Agreements Act, 1932, Empire leaf tobacco was assured a margin of preference over foreign leaf of 2s.0½d. per pound until August 1942. This preference is equivalent to 41.2 cents per pound at the official exchange rate.

3/ Practically all imports in this class.

Office of Foreign Agricultural Relations.

This tabulation brings to date tables on foreign import duties on United States tobacco published in earlier Annual Reports on Tobacco Statistics. Only the two countries where changes in duties have occurred since publication of the last Annual Report are included in this report.

Cigars weighing more than 3 pounds per 1,000, retailing for -	
(A) 2½ cents each or less .....	\$ 2.50 per thousand
(B) More than 2½ and not more than 4 cents each .....	\$ 3.00 per thousand
(C) More than 4 and not more than 6 cents each .....	\$ 4.00 per thousand
(D) More than 6 and not more than 8 cents each .....	\$ 7.00 per thousand
(E) More than 8 and not more than 15 cents each .....	\$10.00 per thousand
(F) More than 15 and not more than 20 cents each .....	\$15.00 per thousand
(G) More than 20 cents each .....	\$20.00 per thousand
Weighing not more than 3 pounds per 1,000 .....	\$ 0.75 per thousand
Cigarettes weighing more than 3 pounds per 1,000 .....	\$ 8.40 per thousand <sup>2/</sup>
Weighing not more than 3 pounds per 1,000 .....	\$ 3.50 per thousand
Papers .....	½ cent for each 50 or fraction thereof
Tubes .....	1 cent for each 50 or fraction thereof
Smoking and chewing tobacco and snuff .....	18 cents per pound

<sup>1/</sup> As imposed by the Revenue Act of 1942, approved Oct. 21, 1942.

<sup>2/</sup> Cigarettes weighing more than 3 pounds per 1,000 which are more than 6½ inches in length are taxable at the rate imposed on cigarettes weighing less than 3 pounds per 1,000, counting each 2-¾ inches or fraction thereof of the length of each as one cigarette. This provision was first imposed by the Revenue Act of May 10, 1934, amending the Revenue Act of Feb. 26, 1926.

Compiled from internal revenue laws of the United States.

Table 41.—Rates of City tax on tobacco products in effect October 1, 1941

City	Date tax : first went : into effect:	Product and rate of tax
Birmingham, Ala.	1939	Cigarettes, when packed in quantities of - (a) 20 or less, 2 cents per package. (b) More than 20 and not more than 40, 4 cents per package. (c) More than 40, 6 cents per package. Smoking tobacco, ½ cent for each 5 cents or fraction thereof of retail price.
